

Summary Report

We must identify and treat causes of all diseases. Elimination of the symptoms is often not the same as elimination of the disease, or multiple diseases from our bodies. Health care practitioners have to identify and treat all of the causes of the diseases.

The following information is presented for informational purposes only. It is not intended to diagnose, treat, or cure any disease and is doubtful any AMA doctor will try any of these methods or tests to determine your illness or use any of the products to try to improve a patient's well being. Seeking an alternative doctor to do blood work and other tests might be beneficial to many persons who are reading the enclosed material.

In the last ten years, I have observed that over 80% of patients in doctor's offices suffer from chronic candida yeast overgrowth. A full 50% of those patients have systemic candida throughout their entire body. For many of these individuals, the problem started when they were children and had a lot of antibiotics prescribed for childhood illnesses or as young adults who were treated with massive doses of antibiotics for acne. Add a diet high in sugar, (all sugars) and simple carbohydrates that convert to sugar and you keep feeding the candida for years. AMA doctors routinely prescribe antibiotics to fight the problem. Candida titer blood tests are simple and inexpensive.

If you really care about your health, you will cut out all sugars and carbs that convert to sugars, this includes carrots that convert to pure sugar. The exception is a product called Xylitol, which is sold by Vitamin Research Products (VRP.COM) under the name Unique Sweet, a product that your body does not metabolize into simple sugars to feed the candida. Ordering information for VRP products can be found at the end of this article.

I have been asked hundreds of times after my radio shows about honey and other natural sweeteners. The answer is-What part of NO do you not understand? This is not a test where 70% will get you a passing grade. In almost every case, a near 100% compliance is needed along with nutritional support for several months and possibly up to one year is needed to see significant differences in one's health; and this is just step one.

Where do you think all of the waste products from the billions of candida and parasites go? The toxins, endotoxins, pee, and pooh from these creatures goes into the body organs, joints, muscles and the brain. This then begins a breeding ground for parasites, viruses, bacteria and fungi.

Add toxic heavy metals and you have a near perfect breeding ground for tearing down your immune system and providing a good home to all the invaders; including but not limited to HIV, Lyme, Hepatitis A, B,&C, respiratory infections, Fibromyalgia, AML Leukemia, SARS, and others.

What is the solution after a major diet modification? In my opinion, getting rid of heavy metals. Several ways are listed below.

EDTA- orally with ChelatoRx from Vitamin Research-
Usually takes from one-three years.

DMSA- orally-Vitamin Research or IV from ACAM doctors.
(mercury detox)

Hair Analysis Test from Vitamin Research Products (*mineral and toxin test*). I suggest testing every three months to check progress. Other tests are also available that are more detailed from many alternative doctors including Chiropractors throughout the country. Hormone levels can also be checked through VRP and others.

Nutritional support is next on my list. Raw vegetables are a must! Lean meats, fish, eggs, and the only grain allowed here is oatmeal for breakfast, served with a skim milk and a pat of butter. Soymilk has sugar and is not allowed. Organic and homegrown foods if possible, offer best results. Absolutely no aspartame, fluoride (toothpaste or water) or chlorine is allowed. That means no tap water is safe to drink or bathe in anywhere in this country. (Author's personal opinion. There are also thousands of pages of research available on Medline.com and Dr. Mercola.com, et al.) I personally know several alternative doctors who will not treat patients who drink city or county tap water. The doctor will ask the patient a simple question- Why treat someone who continues to put heavy metals, pesticides, fluoride, and chlorine back into their body everyday?

Most individuals will feel worse as they detox from a lifetime of food abuse and misuse, as well as having breathed car and truck exhausts. Spraying your house with pesticides and then walking around barefoot in the stuff just does not make much sense to me. In his book, Toxic Metal Syndrome, Dr. Morton Walker, M.D., discusses mental fog and neurological disorders which we believe are a combination of heavy metals and pesticides that have accumulated in the brain and throughout our bodies. Some of you call complaining about dementia-like symptoms and mental fog, you also report taking electrically generated silver ions for several years and complain of a bluish-gray discoloration of the skin. A simple solution is to stop taking the home generated product and detox with EDTA which is addressed in this article.

I went to a small agricultural supply store in south Alabama recently to see what was sold to farmers. Quite honestly it should scare everyone to know that over fourteen tons of chemicals are sold from this one small Ag-supply store every day, during the spring and summer.

Not only do we have to worry about GMO food but numerous pesticides are sprayed on cotton (clothing), soy beans, vegetables, cattle, sheep, goats, pecan trees, blueberries, tomatoes, etc. How many tons of pesticides are sprayed here in the US, and certainly more in some other countries every day, and virtually year round in the tropics? We truly are what we eat!

Another step after trying to eliminate as much of the above as possible is to KILL PARASITES. Many of you have as many as five pounds of parasites in your body. A person was recently referred to me by a large foundation on the east coast. Judging from a recent parasite test, and after a personal interview and examination by a noted alternative doctor, and myself, our guess was that she probably had as many parasites as people in rural villages in Africa. Why doctors ignored this condition for several years is still unknown to me.

There are several herbal products to kill parasites in health food stores and alternative methods from your doctor. The best method I have found is a zapper from Don Croft: www.worldwithoutparasites.org. I also use an extremely potent mixture of black walnut hulls in an alcohol base. I do this cleanse with both the zapper and black walnut several times a year. Many alternative doctors also use the Silver 400 orally and in IV infusions to kill parasites in deep tissue and body organs. A synergistic approach is almost always better than the one pill cure

thrown on us by the AMA and allopathic doctors who often have never had a course in nutrition or know anything about detoxing, or herbs.

The next step is to kill candida and replace the friendly bacteria in the gut. Silver 400 (mild silver protein) is currently used by several thousand doctors in five countries to kill candida, viruses, bacteria, fungi, and other pathogens in the body. As you can see from this article, killing candida or any of the other invaders in your body is not the only solution to the problem. We have seen women and men with candida or other infections that were so severe that the patient would have a massive die-off with just 1/8 of teaspoon of Silver 400. Some reactions like headaches and flu-like symptoms occurred in less than one minute after putting the Silver 400 under the tongue. Many persons ask what an average dose of Silver 400 is for these and other conditions. After consulting with hundreds of doctors over the past ten years, I can tell you that I would increase dosages of Silver 400 to where I could tolerate four teaspoons of Silver 400 per day in divided doses, taken on an empty stomach, with no headaches or herxheimer like reactions. Many persons with little or very low immune systems have been prescribed 4-5 tablespoons of Silver 400 per day for SARS like symptoms in recent months. Please consult your health care provider if there is a question about dosage or protocols.

The most often prescribed probiotic to put friendly bacteria back into the gut is Culturell™ (Lactobacillus G.G.) from Vitamin Research (over 10,000 packets are sold monthly). In addition to putting friendly bacteria back in place of candida, I support the liver with milk thistle and R lipoic Acid both available from VRP. MSP Research also has a detox product for the intestine and liver called Fiber Trim that contains forty botanicals to help rid the body of toxins; it helps the liver to function properly and most importantly helps the elimination of waste through the bowels.

Most alternative doctors and health care providers are convinced that multivitamins and especially minerals are very deficient in almost every person's diet. There are several good sources of vitamins and minerals. After testing by Dr. Jim Akers, PHD, U. of Florida, on over 35 different brands of liquid minerals all were found to contain very low amounts of minerals and up to three kinds of sugars. Just the thing candida craves and should not have. Ask for a recent certificate of analysis to include sugars (all kinds) when you are looking for health related products. Each certificate of analysis costs us over \$900 for every batch we manufacture. We sell to seven companies that sell our products to doctors in five countries and soon we will be adding Panama and countries in the Far East. There are currently five clinical trials involving Silver 400 in Canada, Panama, and the United States. We have completed studies on HIV, Lyme, Hepatitis A, B, and C, since 1996. Current studies involve AML Leukemia, Cystic Fibrosis, and the largest study involves Type II diabetes.

Many individuals reading this will require very specialized nutritional support for thyroid, lymph, intestinal disorders and other illnesses that space just does not permit me to write about. I attend and teach at ten medical meetings a year, almost all of them in Florida. Time does not permit me to travel out of the country but once a year to teach. There are hundreds of medical meetings a year in Canada and the U.S., with over thirty-five in Mexico alone. If time permitted I could teach three times a week-52 weeks a year. Dr. Jeff Bland PHD, President of Metagenics does just that- teach 2-3 times a week but he has a multi-million dollar company selling over a hundred products to doctors to back him up.

This website is an alternative teaching tool that has taken almost a year to prepare and a great deal of expense.

If statistics prove me right only 40% of those who started reading this site will finish reading the literature. Another 40% will start and drop out the first week due to die-off and the discomfort of eliminating pathogens and the sugar cravings. Another 15% will drop out after the first month when they find a doctor that will tell them not to worry about giving up the “good life”. That friends, is why there are so few alternative doctors in this country. Roughly 5% of those that are interested in their health ever finish prescribed protocols.

Lessons can be learned the hard way or the easy way. The easy way is by learning from the mistakes of others. Disease or multiple diseases is the hard way of learning a lesson. The purpose of health is to optimize one’s biological machinery so that one’s life mission can be accomplished in the smoothest and most efficient manner possible. There are those in this world that are *service to self* or *service to others*. I am glad I chose service to others, regardless of the small number of people who ask for help.

Electromagnetic influences are all around us. Some have negative effects on us like ELF’s, microwaves, cell phones, radiation, etc. These unfair physical imbalances added to fluoride, aspartame, chlorine, and pesticides take their toll every day.

It is through quantum physics and electro magnetics that great advances are being made to find cures for many diseases. The Rife machine, magnetic mattress pads from Magnetico, Inc., and our molecularly restructured water are making great strides. In 2000 I added Grander Technology to all Silver products. Since 2000, due to hundreds of hours of research all silver products have the most potent form of restructured waters, actually three to make products that are 30% more bioavailable than even HUNZI water. Our water is in all products sold by MSP Research-Revive Immune, Nanokine Option, all Silver products and our new arthritis product, Collagen Complex.

Hunzi water has a Voltran Rating of almost 600. Our products are molecularly superior and have a voltran rating of over 900. Our profit margins are extremely small compared to products that contain distilled water, 30 cents a gallon in large quantities. The vibrational signature of one of our waters can be added to that of another that has already been altered differently, and combined, they offer a synergistic effect on the human body. The individualized human body projects its own quantum-EM field via the etheric body, which tends to keep the body’s cells organized and operating coherently. This field can be sensed by Kirlian photography (see photo with Silver 400) that actually captures the electrical discharges. Note the changes when Silver 400 is added to the matrix. The dielectric constant is changed and hence lowers the resistance along certain lines, which the electrical discharges tend to follow. Many scientists believe that diseased parts of our body give off added heat (infection) and different electrical discharges. Silver 400, thru the restructured water, subatomic particle size of the silver atoms, and the protein coating on the silver atoms result in it’s ability to start killing viruses, bacteria, fungi, and especially Candida in seconds or minutes as opposed to colloidal (electrically generated homemade) silver, which is 3-5 ppm and due to the large micron size and lack of any component to carry it into deep tissue is not effective for severe infections and certainly not for a life threatening disease. Home brewed silver particles are ten times larger than the opening in your capillaries. The product could not get to deep tissue if it wanted to, nor can it be used in an IV infusion with D₅W or Saline solution. Wrong electrical charge and the patient dies and the doctor goes to jail.

At last count doctors had given over 3000 IV infusions with Silver 400. That count could be as high as 5000 with no deaths or serious side effects. The seven companies that private label and sell my products do not provide all of the data that doctors that buy direct from MSP

Research provide. This company owes a lot to several people who have taken a big step away from allopathic medicines and trusted my protocols and judgments.

I am in awe every week when world class doctors and microbiologists call and ask my opinion with patients and protocols that we are constantly revising and changing as pathogens grow ever stronger and harder to kill not to mention the new genetically made or altered hybrid forms of mycoplasmas that are showing up all over the country this year. Aside from West Nile Virus and Candida, more doctors are treating various forms of mycoplasmas with Silver 400 than any other disease in the summer of 2003.

Without the help of individual testimonials and follow-up much of my research could not have been completed. My medical research assistant "Pat" is retired, disabled and still puts in over 100 hours every month helping this company go forward. Thank you Pat from the bottom of my heart and God Bless You in the months ahead of us.

Sincerely,

Bill T. M^cFarland
